

**SECTION 0: Introductory note**

The product is an article and has no characteristics such as to make it classified as dangerous under current legislation, Regulation (EC) no. 1272/2008. Furthermore, it does not meet the requirements listed in article 31 of Regulation (EC) no. 1907/2006, so-called. REACH. Therefore, in order not to cause confusion, a Safety Data Sheet (SDS) is not provided, but only this Safety Information Sheet (SIS) drawn up following the structure and content of Annex II of the REACH regulation relating to the prescriptions for the compilation of the SDS, as amended by Regulation (EU) 2020/878.

**SECTION 1: Identification of the substance/mixture and of the company/undertaking****1.1. Product identifier**

Trade name:	LATERLITE EXPANDED CLAY
Chemical type:	article (expanded clay)

**1.2. Relevant identified uses of the substance or mixture and uses advised against**

The product commonly used in the construction industry both loose as a lightweight insulating robust fill or along with water, binders, admixtures, and other aggregates, as an aggregate for concrete mix production.

**1.3. Details of the supplier of the safety data sheet**

Registered Office:	Laterlite S.p.A. Via Vittorio Veneto 30 43046 Rubbiano di Solignano(PR) - Italy Ph +39 0525 4198 Fax +39 0525 419988
Technical/Sales Office:	Laterlite S.p.A. Via Correggio 3 20149 Milano - Italy Ph +39 02 48011962 Fax + 39 02 48012242
Plants:	Italy --- Rubbiano di Fornovo (PR) --- Via Vittorio Veneto 57 - Italy --- Ph +39 0525 4198 Italy --- Lentella (CH) --- Località Coccetta - Italy --- Ph + 39 0873 32221 Italy --- Bojano (CB) --- Contrada Popolo - Italy --- Ph +39 0874 772900 Italy --- Enna --- S.S. 192 Km 12,5 - Z.I. Dittaino - Italy --- Ph +39 0935 950002 Italy --- Trezzo sull'Adda (MI) --- Via Achille Grandi 5 --- tel +39 0290964141
Person in charge for the safety data sheet:	WORKING GROUP "ENVIRONMENT" Via Vittorio Veneto 30 43046 Rubbiano di Solignano (PR) - Italy e-mail: <a href="mailto:reach@laterlite.it">reach@laterlite.it</a>

**1.4. Emergency telephone number**

Ph +39 02 48011962 (available only during office hours: 8.30 - 17.30)

**SECTION 2: Hazards identification****2.1. Classification of the substance or mixture**

The product is an article pursuant to EC Regulation No. 1907/2006 (REACH).  
The product does not meet the danger characteristics of section 2.1 of attachment I of EC Regulation No. 1272/2008 (CLP) including explosive articles; therefore, the product is not to be considered dangerous under the aforementioned Regulation.

**2.2. Label elements**

The product is an article within the meaning of of Regulation (EC) 1907/2006 (REACH); therefore, it does not require a label of danger.

**2.3. Other hazards**

The product has no harmful effects to humans or the environment in the form in which it is placed on the market. Under certain conditions, the product may result in the formation of dust.

Contact with the eyes:	Dust may cause irritation and inflammation.
Contact with the skin:	Dust may cause irritation and inflammation.
Inhalation:	Dust may cause irritation and inflammation of the respiratory tract.
Ingestion:	In larger amounts, it may cause irritation and inflammation of the digestive system.

Product constituents do not satisfy the criteria for PBT or vPvB classification according to Annex XIII of Regulation (EC) 1907/2006 (REACH).

**SECTION 3: Composition/information on ingredients****3.3. Articles**

<b>Main constituents</b>		
Expanded clay "Laterlite" 100%:	main mixture of sintered silicon aluminum and iron oxides, in the presence of other trace elements, derived from naturally occurring substance (natural clay) and water-repellent additives in trace amounts	
<b>SECTION 4: First aid measures</b>		
<b>4.1. Description of first aid measures</b>		
Contact with the eyes:	Do not rub eyes to avoid corneal damage. Rinse cautiously with water for several minutes, holding the eyelids open. Remove contact lenses, if present and easy to do. Call an ophthalmologist.	
Contact with the skin:	If skin irritation or rash occurs, wash with plenty of soap and water.	
Inhalation:	(of larger amount of dust) Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a doctor if you feel unwell.	
Ingestion:	Rinse mouth with water. Do not induce vomiting. Call a doctor.	
<b>4.2. Most important symptoms and effects, both acute and delayed</b>		
See SECTION 2 and SECTION 11.		
<b>4.3. Indication of any immediate medical attention and special treatment needed</b>		
See SECTION 4.1. treat symptomatically.		
<b>SECTION 5: Firedighting measures</b>		
<b>5.1. Extinguishing media</b>		
Use extinguishing media appropriate to the source of the fire and the surrounding area.		
<b>5.2. Special hazards arising from the substance or mixture</b>		
The product is non-combustible and non-explosive and does not facilitate or sustain the combustion of other materials.		
<b>5.3. Advice for firefighters</b>		
Move containers from fire area if it can be done without risk. Wear special protective equipment, such as boots, overalls, gloves, eye and face protection and self breathing apparatus.		
<b>SECTION 6: Accidental release measures</b>		
<b>6.1. Personal precautions, protective equipment, and procedures in case of emergency</b>		
Evacuate and isolate the area until complete dispersion of the product. Alert the emergency personnel. Ensure adequate ventilation. Avoid generating and spreading dust. Avoid inhalation of dust and contact with eyes and skin. Where necessary, wear appropriate personal protective equipment.		
<b>6.2. Environmental precautions</b>		
Prevent the product from leaking into the environment and run off into drains, surface waters and groundwater. Alert competent authorities if large amounts into drains or watercourses or contamination of soil and/or vegetation.		
<b>6.3. Methods and material for containment and cleaning up</b>		
Contain the spillage. Cover drains. Collect the product by mechanical means or dry vacuum cleaners and transfer into a suitable container properly labeled. Dispose of in accordance with local and national legislation. Clean surface thoroughly to remove residual contamination.		
<b>6.4. Reference to other sections</b>		
For information on personal protection see SECTION 8. For information on disposal considerations, see SECTION 13.		
<b>SECTION 7: Handling and storage</b>		
<b>7.1. Precautions for safe handling</b>		
Ensure adequate ventilation. Avoid generating and spreading dust. Avoid inhalation of dust and contact with eyes and skin. Where necessary, wear appropriate personal protective equipment.		
<b>7.2. Conditions for safe storage, including any incompatibilities</b>		
No specific measure is required.		
<b>7.3. Specific end use(s)</b>		
The product commonly used in the construction industry both loose as a lightweight insulating robust fill or along with water, binders, admixtures, and other aggregates, as an aggregate for concrete mix production.		
<b>SECTION 8: Exposure controls/personal protection</b>		
<b>8.2. Exposure controls</b>		
Dust - inhalable fraction	ACGIH - TWA ( 8 hours)	= 10 mg/m <sup>3</sup>
Dust - respirable fraction	ACGIH - TWA ( 8 hours)	= 3 mg/m <sup>3</sup>
Free crystalline silica - respirable fraction	ACGIH - TWA ( 8 hours)	= 0.025 mg/m <sup>3</sup>

## 8.2. Exposure controls

Where necessary, wear personal protective equipment in accordance with standards set by European and national legislation. Consult the supplier in all cases before making a final decision.

Skin protection:	Wear approved work clothes (able to cover the forearms in continuity with gloves) and safety footwear for professional use.
Hand protection:	Wear approved alkali-resistant impervious gloves (breakthrough time > 480 minutes) in compliance with Directive 89/686/EEC and EN 374 - part 1, 2 and 3. Since the product is a mixture of several substances, the resistance of the glove material (degradation, breakthrough time and permeation) should be tested before use, as it is not predictable in advance.
Eye protection:	Wear approved glasses or safety goggles in compliance with EN 166.
Respiratory protection:	Wear an approved filtering facepiece respirator (FFP1) in compliance with EN 149.
Technical and hygienic measures:	Ensure containment of the concentration of inhalable/respirable particulate within the values reported in SECTION 8.1. Take appropriate measures to contain dust emissions into the environment and, where necessary, capture and convey dust to appropriate abatement systems. Do not eat, drink, or smoke during use. Wash hands and other exposed areas after use. Wash periodically clothes and personal protective equipment to remove contaminants. Handle the product in accordance with good industrial hygiene and safety practices.

## SECTION 9: Physical and chemicals properties

### 9.1. Information on basic physical and chemical properties

a) Appearance:	brown solid
b) Odour:	odourless
c) Odour threshold:	not available
d) pH:	8 - 10 (aqueous solution)
e) Melting/freezing point:	not available
f) Initial boiling point and boiling range:	not available
g) Flash point:	not available
h) Evaporation rate:	not applicable
i) Flammability (solid, gas):	non-combustible (Class A1)
j) Upper/lower flammability or explosive limits:	not applicable
k) Vapour pressure:	not applicable
l) Vapour density:	not applicable
m) Relative density:	≈ 250 - 700 kg/m <sup>3</sup>
n) Solubility:	insoluble in water
o) Partition coefficient: n-octanol/water:	not applicable
p) Auto-ignition temperature:	not available
q) Decomposition temperature:	not available
r) Viscosity:	not applicable
s) Explosive properties:	not explosive
t) Oxidising properties:	not available

### 9.2. Other information

Not available.

## SECTION 10: Stability and reactivity

### 10.1. Reactivity

No particular danger of reaction with other substances under recommended conditions of use.

### 10.2. Chemical stability

Stable under recommended use and storage conditions. When mixed with water, the product hardens by forming a mass generally stable and inert.

### 10.3. Possibility of hazardous reactions

No possibility of hazardous reactions under recommended use and storage conditions.

### 10.4. Conditions to avoid

No particular condition to avoid.

### 10.5. Incompatible materials

None in particular.

#### 10.6. Hazardous decomposition products

Not known.

### SECTION 11: Toxicological information

#### 11.1. Information on toxicological effects

Contact with the eyes:	Dust may cause irritation and inflammation.
Contact with the skin:	Dust may cause irritation and inflammation.
Inhalation:	Dust may cause irritation and inflammation of the respiratory tract.
Ingestion:	In larger amounts, it may cause irritation and inflammation of the digestive system.

a) Acute toxicity

Not relevant.

b) Irritation

Not relevant.

c) Corrosion

Not relevant.

d) Sensitisation

Not relevant.

e) Repeated dose toxicity

Not relevant.

f) Carcinogenicity

Not relevant.

g) Mutagenicity

Not relevant.

h) Toxicity for reproduction

Not relevant.

### SECTION 12: Ecological information

#### 12.1. Toxicity

The product shows no effects of processing or behavior likely to cause damage to the environment under normal conditions of use and storage.

#### 12.2. Persistence and degradability

Not relevant (inorganic material).

#### 12.3. Bioaccumulative potential

Not relevant (inorganic material).

#### 12.4. Mobility in soil

Not relevant (inorganic material).

#### 12.5. Results of PBT and vPvB assessment

Product constituents do not satisfy the criteria for PBT or vPvB classification according to Annex XIII of Regulation (EC) 1907/2006 (REACH).

#### 12.6. Other adverse effects

Not available.

### SECTION 13: Disposal considerations

#### 13.1. Waste treatment methods

If possible, recover the product. Disposal or recovery must be carried out in accordance with national legislation. It is therefore advisable to contact specialized and authorized companies that can give indications on how to arrange recovery or disposal

### SEZIONE 14: Transport information

The product is subject to the provisions of existing legislation governing the transport of dangerous goods by road (ADR), rail (RID), sea (IMDG Code) and air (IATA). During transport, maintain the product in closed packaging in order to avoid dispersion.

#### 14.1. UN number

Not applicable.

**14.2. UN proper shipping name**

Not applicable.

**14.3. Transport hazard class(es)**

Not applicable.

**14.4. Packing group**

Not applicable.

**14.5. Environmental hazards**

Not applicable.

**14.6. Special precautions for user**

Not applicable.

**14.7. Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code**

Not applicable.

**SEZIONE 15: Regulatory information****15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture**

- The product is an article within the meaning of of Regulation (EC) 1907/2006 (REACH); therefore, classification and labeling criteria established by (EC) Regulation 1272/2008 (CLP) do not apply.
- As part of the " Agreement on Workers' Health Protection through the Good Handling and Use of Crystalline Silica and Products Containing it " (signed on 25/10/2006 by Employee and Employer European sectoral associations), the safe handling practices identified in the "Good practice guides" (<http://www.nepsi.eu/agreement-good-practice-guide/good-practice-guide.aspx>) have been adopted. Depending on the specific product and its method of use, you should enable appropriate technical and organizational measures and a systematic monitoring of occupational exposure.

The product does not contain substances of very high concern (SVHC) included in the candidate list for Authorisation or subjected to Authorisation/Restriction according to Regulation (EC) 1907/2006 (REACH).

**15.2. Chemical safety assessment**

A chemical safety assessment has not been performed for the product.

**SEZIONE 16: Other information**

Version 2 modifies the previous version n. 1 of 31.10.2014 in sections 1 and 2.

Key references and data sources:

- Regulation (EC) 1272/2008 (CLP) (and its subsequent modifications and amendments)
- Regulation (EC) 1907/2006 (REACH) (and its subsequent modifications and amendments)

Acronyms:

ACGIH:	american conference of governmental industrial hygienists
ADR:	euopean agreement concerning the international carriage of dangerous goods by road
CAS:	chemical abstracts service
CLP:	classification labelling and packaging
EINECS:	euopean inventory of existing commercial chemical substances
IATA:	international air transport association
IMDG Code:	International Maritime Dangerous Goods Code
PBT:	persistent, bioaccumulative and toxic
REACH:	registration, evaluation and authorization of chemicals
RID:	regulations concerning the international carriage of dangerous goods by rail
TWA:	time weighted average
vPvB:	very persistent and very bioaccumulative

Notes:

The information provided in this safety data sheet is correct to the best of our knowledge at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation and disposal and is not to be considered a warranty or quality specification. The user must verify the suitability and completeness of the information in relation to its particular use of the product.
